KNIGHTS NEWS

27th November 2026

Dear families,

We've had another lovely week at Knights Enham! As we get closer to Christmas, our learning and activities continue to keep us busy.

We started the week with an assembly focused on **kindness** – the importance of saying kind things and recognising the impact our words can have on how others feel, both positively and negatively. This followed on nicely from our discussions during Anti-Bullying Week and the importance of speaking out.

We've also enjoyed some fantastic outdoor learning opportunities. Year 4 had a wonderful time at the local woods for their tree-planting trip, followed by Key Stage 1 on Wednesday. The children thoroughly enjoyed learning more about their local environment and making a positive difference to their community.

Year 5 also enjoyed a trip to the cinema, and we finished the week with our dress-down day. A huge thank you to everyone who contributed bottles – your support is very much appreciated!

Looking ahead to next week

Our Christmas letterboxes will be arriving! From Monday, children can start bringing in their Christmas cards and letters for friends in their class or across the school.

If you would like a class list to help your child with names, please contact the school office. We are very happy to provide a list of first names.

That's all from us this week. Thank you, as always, for your continued support.

Have a lovely weekend!

The Knights Enham Team

Online Safety

Should You Upload Photos of Children Into AI? AI image tools are becoming increasingly popular, allowing people to change backgrounds, enhance photographs or create entirely new images. But what happens when we upload photographs of our children into these tools? Some questions worth considering include:

- Where will the photograph be stored?
- Could it be used to train an AI system?
- Can the image be permanently deleted?
- Does it contain identifying information, such as a school uniform or location?
- Could the image be copied, altered or misused?

This doesn't mean that every AI image tool is unsafe, but it is worth understanding how a service uses photographs before uploading them, particularly when those photographs are of children.
